DETAILED ACTION

1. This Office action is in response to the communication received on November 16, 2005.

Claims 14-25 are pending in the application

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-21, drawn to a process for work management, classified in class 705, subclass 8.
- II. Claims 22-25, drawn to a business process management classified in class 345, subclass 163.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as displaying a quality of the performance. This separate use patentably distinguishes the invention of group I from group II, since the feature displaying a quality of the performance is not a limitation of group I. See MPEP § 806.05(d).

4. Since the restriction is complex and examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3623

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
